

I got XM for Christmas, and I love it! There's music that I haven't heard since I was in high school and college. There's other great music that I never hear on AM or FM. Now that XM broadcasts local traffic and weather, I can check it whenever I need to know--and I don't have to wait 10, 15, or 20 minutes until it comes around again (as on the local FM stations). I pay for this service, I want this service, and I don't want anybody telling me that I can't continue to have this service. Please do not allow the National Association of Broadcasters to interfere with my ability to get local traffic and weather on XM radio. I urge you to reject the NAB's petition 04-160! Please support increased competition, and the greater variety of programming that XM offers. Thank you.
